Profile

Strategic CTS Lead and Infrastructure Engineer with a proven track record of leading enterprise-level technical support teams. Adept at developing advanced automations, driving remote management strategies, and modernizing IT environments to build secure, highly provisioned network infrastructures.

Employment History

Network Administrator / CTS Lead, South Seneca Central School District

July 2025 — Present

- Lead district IT operations, infrastructure management, and technical support services.
- Develop and deploy custom PowerShell scripts via NinjaOne for zero-touch global software installations.
- Orchestrate structural IT transitions, including comprehensive IaaS migrations and Active Directory structure overhauls.

Network Technician Assistant, South Seneca Central School District Ovid, NY

July 2019 — July 2025

- Provided assistance to network users regarding troubleshooting and procedures.
- Tested and accurately configured software and maintained high functioning hardware.
- Leveraged PowerShell, Bash, and Google Apps Script to automate processes, significantly reducing task completion times and boosting operational efficiency.
- Advised staff on effective utilization of existing network resources and tools.
- Worked to maintain the confidentiality of information and network data.

Education

High School Diploma, South Seneca Central School District

June 2018
